EXPERIENCE

Chartwells, University of Utah

Operations and Sales Support Analyst

Salt Lake City

Feb 2024 - Dec 2024

- Conducted data analysis on sales and inventory to support decision-making and improve workflows.
- Prepared detailed reports using Excel, streamlining processes and providing insights to the management.
- Collaborated with teams to improve inventory accuracy, ensuring optimal stock levels and minimizing waste.

Capgemini Technological Services (Financial Services Business Unit)

Business Intelligence Data Analyst

Hyderabad, India

August 2021 - July 2023

- Processed and analyzed large volumes of complex data from various Data sources and reporting for the Farmers Insurance client, maintaining accurate records, leading to a 20% reduction in reporting discrepancies.
- Designed dashboards in Power BI to identify trends and track key performance indicators (KPIs) and effectively communicated insights to various departments like sales, compensation, marketing, IT and finance.
- Handled ad-hoc reporting requests. Performed risk oversight using statistical analysis to identify anomalies, mitigate financial risks, and ensure alignment with company standards.
- Developed predictive models with 90% accuracy for Dwelling and Auto Liability Claims Management, enhancing claims resolution forecasting and streamlining operations.
- Performed data validation with strong attention to detail, ensuring data integrity across multiple sources, and utilized Excel, Python, and SQL for data manipulation and cleaning.
- Automated data workflows with Python, reducing manual data processing efforts by 40%, and designed ETL pipelines to ensure accurate and timely data flow, leading to a 30% improvement in data update speed.
- Collaborated with cross-functional teams to enhance business processes, prepared test plans, and conducted data quality assessments, improving data reliability by 20% and reducing errors by 15%.
- Maintained detailed documentation of requirements, design, development and testing and followed best practices.

Capgemini Technological Services

Analytics Intern

Hyderabad, India

April 2021 - July 2021

- Consolidated complex data sets using Excel and SQL, eliminating data redundancy and providing analytical support
- Closely worked with senior data analysts and built Tableau dashboards to visualize core business KPIs and worked on valuation reports, positively impacting financial and pricing outcomes within the asset management domain.
- Actively engaged in acquiring new skills. Dedicated 100+ hours in continuous learning and research through workshops and training sessions to broaden the skills and keep up with the trends.
